

# Music Bingo 90

## How To Play

Music Bingo 90 is a fun and exciting twist on the classic bingo game, with 90 popular songs from various genres and decades. Each player receives a bingo card with four 9x3 bingo boards containing the numbers from 1 to 90. The numbers are distributed on the card where column 1 has the numbers 1-9, column 2 has the numbers 10-19 etc. The bingo boards contain all the numbers from 1 to 90 .

In addition to the bingo boards, there is also a list of all the songs included in the bingo on the sheet. When a song/artist is played, this must be found on the list and the number representing the song/artist must be ticked on the bingo board.

In this type of game there are 3 bingo winners. The first winner is when one has filled one of the rows (i.e. 5 songs), then there are two rows within the same frame/box, and finally three rows within the same frame/box. The songs are ticked off as they are played.

You have also received a link to a Spotify playlist that is adapted to the music bingo.

A good tip is to set Spotify playback to random, that way you will always get a random playback and unique completion of the music bingo.

Usually, it is enough to play about 60 seconds of a song, but it may also be a good idea to control it by verse and chorus, e.g. play until the first chorus is finished. Normally, around 60 songs must be played to achieve bingo (3 rows), but this depends on how many boards are played on. When hosting a music bingo game, it is crucial to adapt the tempo to the group of players participating.

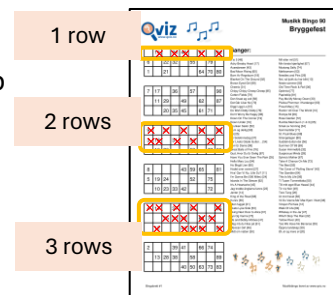

In addition to the bingo boards, it also comes with a PDF file with an overview of the songs, as well as a link and QR code to the Spotify list.

A small tip is that you use the tick sheet that you will find on page 2 of the song list. Here you cross off the numbers that have been drawn (based on which songs have been played). This will make it easier to check any bingos.

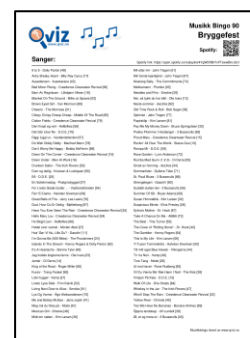

Good luck! And remember, at <https://www.musicbingos.com/faq> you may find answers to different questions.
